

Characteristics of life

Across

- 5. Study of organisms and how they interact with each other and their environment
- 8. Segment of DNA those codes for a protein
- 10. A group of cells working together to do a job
- 13. Study of life
- 15. Composed of many cells
- 16. Process where characteristics in a population change over time
- 17. Division containing plants, animals, and fungi
- 19. Producing more organisms like themselves
- 23. The ability of populations of organisms to change over time
- 24. The three major subdivisions of all organisms

Down

- 1. Traits that improve an organism's chance for survival
- 2. The abbreviation for DNA
- 3. Degree of internal and external order in organisms
- 4. Maintaining a stable internal environment
- 6. Basic unit of life
- 7. All of the chemical reactions taking place inside an organism
- 9. Communities of organisms and their physical environment
- 11. A physical or chemical change in an organism's environment
- 12. Increase in size
- 14. Small parts of a cell carrying on different jobs
- 18. A bacterium is an example
- 20. Process of becoming an adult
- 21. New cells forming from preexisting cells
- 22. Organisms with favorable traits have a better chance to survive and reproduce
